I research sustainable datacenters from a computer systems perspective, particularly focused on caching and storage systems. My work includes improves efficiency and sustainability through hardware-software co-design and grounding design in mathematical modeling. My work has appeared at OSDI and SOSP, including receiving a Best Paper Award at SOSP 2021. I am a 2021 NDSEG fellow, a 2023 EECS Rising Star, and a 2025 Siebel Scholar. I also strive to increase inclusion in computer science, including by creating a DEI course for CS PhD students. Due to these efforts, I was awarded CMU's Graduate Student Service Award in 2022 and a Best Paper Award at SIGCSE 2023.
